VEHICLE DETAILS

ADDITIONAL INFORMATION / SERVICE HISTORY

1954 Nash Healey (Aston DB2 Engined).

Chassis number: JR1001G

Registration Number: RSU111

The only example of this rare model produced from new with an Aston Martin DB2 Engine as opposed to the more prosaic alvis engined examples sold into the UK market when new. Being a Panel Craft alloy bodied example it is of course also eligible as a Mille Miglia entrant & competitor.

The car is in perfect concours condition having been full restored to a very high standard over a 9 year period. The car was UK ordered when new & had an Aston Martin DB2 3 litre engine installed from new making a completely unique example & the only one in the world so equipped.

The car is finished in flawless pale blue paintwork with new dark blue leather to the interior. Under the bonnet the car is again pristine with the 3 litre Aston Martin engine being fueled by triple twin choke Webber carburettors. The dash board is of burr wood finely figured with a matching steering wheel. The hood stows behind the rear seats.

This car has resided in a prominent Scottish motor museum for many years & has always been kept in good running condition. Viewings are by appointment near inverness. The car is of a quality however that it may be purchased in confidence sight unseen. We can ship the car world wide for the lucky new owner.
